

RRTA's Cleaning Practices during Coronavirus Situation

March 11, 2020

The health and safety of our customers and employees is our top priority. With the situation surrounding the Coronavirus unfolding, we want to inform you on what measures SCTA and RRTA are taking for all our customers and employees.

SCTA continues to monitor the CDC reports, PennDOT, and the PA Dept. of Health for updates in Pennsylvania. **As of this date, neither the CDC, nor the PA Department of Health have placed any restrictions on the use of public transit.**

Currently RRTA's cleaning practices are as follows:

All RRTA buses are cleaned every night with a bleach cleansing product throughout the bus and driver's seat/work area

Queen Street Station waiting area is also cleaned with the bleach cleansing products

We continue to monitor the situation and will update customers of any changes to our efforts as they occur.
